Part Number Compilation:

NOTE 1:

The exact detail of switches/sensors/transmitters fitted in the monitor is not fully specified by the basic part number. The 'feature designator' provides a mechanism for cross-referencing to a centralised log establish the make and model of parts fitted in a given unit.

FURTHER NOTES:

Function assemblies 14, 16, 17, 25, 40, 42 and 43 use a small cover (see C110119). Where function 43 uses cylindrical sensors longer than 40mm, a tall cover is used (see C110119). Function 52, 53, 55, 56, 58, 59 and 70 use a tall cover (see C110119).

The maximum permitted power that can be dissipated within a monitor is specified on drawing A160168 and the electrical characteristics and ratings of the components fitted must not allow this value to be exceeded.
